

# NFCT Trail Update

---

**Map:** 6

**Date of Update:** 3-8-2015

**Location:** Nulhegan Gorge

**Waterbody:** Nulhegan River

**Town:** Brunswick, VT

**Lat/Long:** 44° 46' 04.33" N, 71° 42' 22.11" W

**Elevation:** 1,131 feet

**Overview:** The Nulhegan Gorge can be challenging to navigate. We are working with landowners to establish a more straight forward route to get around the gorge. In the meantime, navigation through the gorge requires two small portages (under high and low water conditions you will likely need to do two, when you can navigate the rocky section one will be required around the gorge) and a short ferry across the river.

**Site Information:** During high waters you will encounter a flat stretch of what can typically be classified as Class 1-2 waters just above the gorge, in low waters, this area is very rocky and hard to navigate. On river right you will find the Silvio O. Conte Nature Trail, installed by the Northwoods Stewardship Center. You can access this trail (currently there is not a formal take-out or portage signage) and use the corridor to portage around or scout this area. When you put back in you will be in view of the rail road bridge. You will need to ferry across this section. Depending on the water conditions, you may need to line on the shore for a short distance. The take out allowing portage around the section of the gorge that can be Class 3-4 waters is on river left, just downstream of the rail road bridge. The portage around the gorge has a tendency to become grown-in. The NFCT annual maintains this corridor, but we have noticed that signage has a tendency to disappear.
